Testimonials and Mentors

The RECO Journey

Imagine Neel. A high schooler at a private school, Neel is curious, creative, and likes most subjects. His broad-minded parents hope he will attend a college like Stanford, LSE, or Ashoka. They want him to get out of his shell and think independently, but aren't sure how to structure his journey.

If you relate to Neel, RECO is for you. Here's the kind of journey we'll personalize for your child.

Grade 8

Engages with op-eds and reports to explore his interest in sustainability. Launches a blog on climate change.

Grade 9

Takes a liking to physics in school. Incorporates this into his blog by publishing pieces on climate engineering.

Grade 10

Begins reading complex texts like research papers and scholarly books. Starts writing a climate-focused annotated bibliography – a research activity.

Grade 11

Switching from physics to economics, Neel expands his annotated bibliography with a section on climate policy, capturing his evolving interests and journey.

Grade 12

With **20,000+ words** of high-quality academic writing completed, **Neel can focus on just college apps!**

RECO Reads Jr.

Set yourself up to tackle college-level texts by building strong foundations in reading, writing, and critical thinking. Engage with age-appropriate resources in your area of interest and write blogs.

Write 1500+ words | 8-12 sessions | Custom schedule

Begin Critical Thinking

How it works

Tackle a theme you're interested in using accessible resources. For example, a student interested in tech, could study a policy brief by the UN, a TED Talk, a report by OpenAI, an interview with Bill Gates, and a data set.

Through the course, students will write a blog on each resource. By the end of the course, they will have a series of blogs, totalling 1500+ words, which they can publish.

Kiara (Grade 9, Hill Spring) used NYT and ET articles, TED Talks, poetry, and UNESCO datasets, to write blogs exploring different gender-related issues such as stereotypes, sati, discrimination, and more.

RECO Reads Sr.

Build advanced knowledge in any subject area by engaging deeply with complex texts. Designed to showcase your maturity and process as a thinker. Recommended before writing a research paper.

Write 2000+ words | 8-12 sessions | Custom schedule

Tackle Complex Texts

How it works

Close-read and analyze a curated selection of scholarly texts in your field, including classic and recently published works. For example, a student applying for Psychology may tackle books by Sigmund Freud and Angela Duckworth, as well as papers published in the world's most prestigious journals.

Curate your writing in an Annotated Bibliography – a widely recognized academic document that you build over time.

Freya Shah (Grade 11, Chatrabhuj Narsee School) analyzed Economics and Management texts by Daniel Kahneman, Thomas Piketty, and others recommended by Oxford and LSE.

RECO Impact

Write a public-facing research article tackling a real-world issue. Show universities how you can use knowledge to contribute to your campus community and improve society.

Write 1500+ words | 8-12 sessions | Custom schedule

Write like a Journalist

How it works

Choose a real-world issue related to your extracurricular or community service activities. Use the academic resources we curate for you related to this issue to write your article.

Along with showing civic-mindedness, RECO Impact also brings coherence to your profile. For example, a student who teaches at an NGO and is applying for economics can write an article analyzing economic data on education!

Karthik (Grade 10, Seth MR Jaipuria) wrote an op-ed using evidence from Amnesty International to argue that social media algorithms promoted hate speech and exacerbated the Rohingya refugee crisis.

Writing Coaching

Work one-on-one with an expert writing coach to brainstorm, develop, and/or polish a submission to contests such as John Locke, Harvard International Review, and more. Sign up for 1 session or a package of 4 or more sessions.

My RECO mentor helped me make a mind map, and guided me through my thoughts step by step. They didn't give me lines to write, but helped me understand how to build my own ideas. I got shortlisted for the John Locke Essay Contest. I'm glad I chose RECO.

Avika Ghotikar, JBCN, Mumbai

Meet Our Founder

After scoring 45/45 in the IBDP, Paritosh Kanoria earned a BA from Stanford and an MA from UChicago, where he studied on a full scholarship. Before RECO, Paritosh managed programs for high schoolers at Ashoka University and was an Admissions Associate at Stanford. He also assists the Chancellor at Nayanta University, Pune.

Testimonials

*“RECO built a great rapport with Kiara (right) and helped her enormously in building a strong academic base at an early age. Their structured, age-appropriate approach builds research and writing skills while boosting confidence. I have seen clear improvement in Kiara’s ability to research independently, organize ideas, and present work effectively. – **Pooja Jain (Mother of Kiara)***

*I developed crucial skills in critical and interdisciplinary thinking — how to consume information effectively and formulate informed questions. My instructors were very approachable. I learned a lot about myself and my academic interests! – **Karthik Agarwal (Grade 9, Seth MR Jaipuria, Lucknow)***

*“My mentor was very knowledgeable and provided his professional insights to feed my curiosity. He had previously researched topics I’m interested in, so we instantly worked well together. My research skills and college application has improved.” – **Vivaan Sehgal (Grade 11, Bangkok Patana School, Bangkok)***

*RECO helped my daughter, Mahi, select a research topic carefully to meet her objectives, and provided readings that were apt for her level (not too intense but adequately advanced to push her thinking). We highly recommend RECO to student looking build skills, curiosity and their profile. – **Vinti Garga (Mother of a Grade 10 RECO alum)***

Meet our Mentors

Our mentors have received PhD/Master's degrees and taught at the finest universities in India, including Ashoka, IIT Delhi/Bombay, ISI, and more. Beyond their qualifications, our mentors are carefully selected for their empathy and ability to relate with students.

Anirudh Raghavan
PhD, Sociology, Ashoka

Mohan Reddy
PhD, Biology, Ashoka

Shabdita Tiwari
MA, History, Ashoka

Thomson Chakramakkil
PhD, STS, IIT Delhi

Debadyuiti Ghosh
PhD, Physics, Ashoka

Sahil Mittal
VC Office, Plaksha
